

For deeper wells and applications requiring higher flow ratings, Franklin's 6 - inch and 8 - inch submersibles are available from 4 through 150 KW.

For operation in wells with high temperatures and /or low flow conditions Franklin Electric offer 6" High temp 90°C and 8" High Temp 75°C motors.

Franklin Electric's control and protection devices have been designed exclusively to help extend the life of Franklin Electric Motors by monitoring Current, Voltage and Temperature. The Franklin Electric Sub Monitor is the leading state of innovation in Pump & Motor protection.
